IQGEO

Deepomatic Lens for utilities

The only field-ready AI computer vision platform for utility networks, from construction to operations.
With Deepomatic Lens, automate quality inspection and document your grid reliably.

+20M
field jobs analyzed per year

+30,000
daily field users
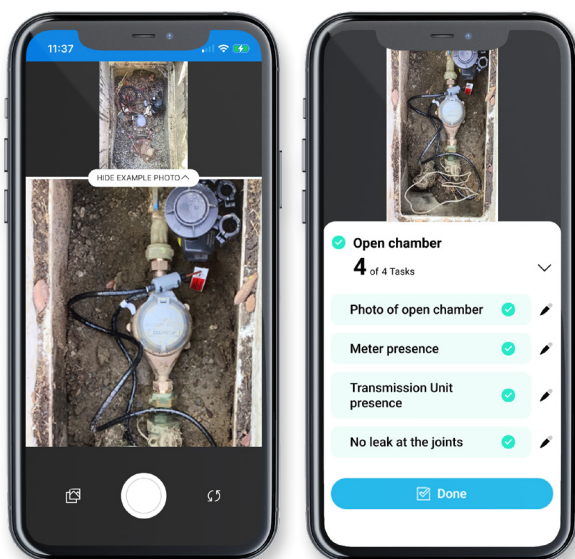

Solutions30   Jacobs   circet Ireland & UK

In the field

Live feedback to field worker on photo conformity and work compliance

In the office

Dedicated back-office dashboards providing access to photos, QC results and operational KPIs

IQGEO

Benefits

First-Time-Right field jobs
Utility grids photos are analyzed in real-time to ensure your workers perform their job right the first time.

Enriched as-builts
Get the full stack of data on network assets and their environment to create accurate as-built documentation

Accurate closeouts
Photo documentation conformity is verified in real-time to provide operator and contractor organizations reliable proof about the work done in the field

Process automation
Gain efficiency by automating processes such as contractor payment, asset inventory and asset condition monitoring.

Why Deepomatic Lens?

Easy integration
Faster implementation thanks to existing integration with IQGeo Workflow Manager, Praxedo, Zinier, Oracle, SiteTracker, Render & more

Unbeaten AI computer vision expertise
Proven expertise in utilities with off-the-shelf AI models for a faster time-to-value

IQGeo, a flexible network model management solution

From rapid design to asset management to outage restoration, our game-changing software integrated with your GIS and other network data to revolutionize your system of record.

Planning & design > **Construction** > **Operations & maintenance** > **Disaster response**

- Transform to network model management
- Apply a modern utillity experience
- Streamlined field reporting

- Automated quality inspection
- Accelerate digital transformation
- Improve data accuracy

Our flexible and powerful network model management solution enables utilities to digitalize the entire lifecycle of the grid.
